

# INTENTION Creates Reality

## “The Breakthrough Celebration”

In recent years, more people have heard about the Mayan Calendar and what this highly evolved race predicted. They were able to depict time and foresee the future outside of our solar system. Through mathematical calculations dating back 16.4 billion years they devised a calendar that had 9 levels divided into 13 sections consisting of 7 days and 6 nights. A DAY signified a period of enlightenment or increase in consciousness while each NIGHT was a period of applying that consciousness. Furthermore, each level had a particular *intention*. To get a better grasp of the time frame of DAY and NIGHT, at the beginning of the 1st level, 16.4 billion years ago (Cellular) each DAY and NIGHT was 1.26 billion years. For those unfamiliar with this notion of day and night not equalling 24 hours, it can become somewhat confusing. Yet as time speeds up, this 8th level (Galactic) that we are presently living in, each DAY and NIGHT signifies 360 days. When we reach the final 9th level (Universal) in 2011 each DAY and NIGHT will equal 20 days.

Back on Nov. 24, 2006 we made the transition to the Fifth DAY, which will now last 360 days. The Fifth DAY is the ‘pulse of LIGHT’, representing the Light of Quetzalcoatl or Christ Energy. This pulse of LIGHT carries the breakthrough energy of this Galactic Underworld (*an Underworld is a specific level of evolution of consciousness*). This Galactic Underworld is in reality an exactly charted wave movement of alternating energies that chart the overall collective development of humanity at the present time.

“For the first time in history, a small minority of humanity has now come to realize that we are living in a divine process of creation and that this process is exactly charted by the Mayan Calendar”, says Carl Calleman.

On **May 22, 2007** we will be at the halfway point of the Fifth DAY. This day, coined “**The Breakthrough Celebration**”, will be a day where thousands of people around the world will gather together in joy and focus on creating a new reality. Here are examples of what many people will SEE on that day:

**Be it Now!** A vision of our world that we can ALL believe in!

We see clearly a world of harmony and peace amongst nations, races, genders, ideologies and religions.

We see acceptance by all of the many paths available for the human spirit to realize its highest potential through art, music, culture, education, science, religion, adventure and joyous living.

We see all life on Planet Earth living in balance, harmony and respect.

We see perfect health, well being, infinite abundance and profound inner peace as the norm amongst our brothers and sisters of Planet Earth.

We see science and technology maturing to serve the planet in wholesome, productive and abundant ways that feeds, clothes, houses and nourishes the body and spirit of the world’s populations, while nurturing Planet Earth’s pristine nature.

We see sustainable communities linked together by worthy causes bringing intelligence, wisdom, compassion, sustenance, spirit, and a sense of belonging and unity to everyone.

We see effective government that abides by the principles of Divine Harmony and that operates from a vision of humanity’s greater purpose.

We see the people of Planet Earth acting as a single being with vision, intent and conscious creativity while simultaneously honoring and nurturing the Divine Individuality of each member from birth through wholesome education and a vision-oriented social and economic structure.

We see the life on Planet Earth joining in a single song of praise and gratitude and reaching out to the heavens for exploration and adventure.

**Let’s BE part of this wave of LOVE!**

For Mayan Calendar readings & update on May 22 event, call Stephanie Labelle 250-337-0055. With thanks to Carl Johan Calleman /in memory of Ian XEL Lungold for their exhaustive research on the Mayan Calendar.
