# THE "HUEMAN" VEHICLE

## We're on the road again!

We have prepared for journeys like this many times before. It would astound us to know the full travel itinerary we embarked upon many eons ago!

You may have noticed my spelling of the word human, as "Hueman"...the purpose is divine remembrance. Let me expand on that...

"Hu" is sometimes called the sound of God or Source. It proclaims our spark of the ONE-NESS. Toned, it allows us to reach up, commune and expand consciousness. Chanted enmasse, it opens us to states of bliss.

The added "e" in Hue denotes our personal colour signatures, who we are in vibration and prismatic Light; our colour codes of sacred geometry. It speaks of who we are energetically, where we have sojourned and the highs and lows of our individuated expressions. Our raiment of sound and light is our cosmic fingerprint, identifying us as unique in design. Wherever we travel, our banner shines forth to tell the tale of our personal journey; the engine that powers us, our internal "governor", roads taken, and the detours we have embraced along the way.

**There is no one  
in the whole of creation  
exactly like us!!!!**

The resources we carry in our power "tool kit" during these accelerated times are,

- the ability to recognize our unique design,
- to make choices that resonate with our understanding and extend energy
- to give to or assist others on the good red road.

So NOW we are moving quickly toward Highway 11:11:11 to create a wave of energy for the next level of existence.

Some will choose to travel up front, some in the middle and others will hold up the flanks...but we are all heading in the same direction. We're on the way HOME in whichever way is meaningful to us.

Here are some guidelines for this Grand Adventure:

- Get rid of excess baggage and travel Light
- Turn on your high beams
- Keep your vehicle well maintained
- Honk your own horn once in awhile
- Avoid road rage at all costs
- Allow others space on the road and model patience and courtesy
- Stop and rest when you're tired
- Put high quality fuel in your tank
- Stop and ask for directions if you get lost
- Enjoy detours
- Throw away your worn, torn maps and **follow your internal GPS .... your heart!**

Yes! Shift is indeed happening and we are being rallied to be the ones who turn the key, rev the engine, engage the clutch, go into high gear and step on the accelerator.

**So...fasten your seat belts! Move forward whole, bold and comfortable at the wheel... We've got some shiftn' to do!!!!!!**

*Delaine Walsh has been serving Vancouver Island since Jan. 11, 1992. She has opened the Breakthrough Healing Center in Parksville to assist you on your travels. Contact her at 250-248-8074.*
