

**WATER
WATER**

Love

**WATER
WATER**

The answer to every question is

Love; and the purest structured water is a combination of love and gratitude. In some holy scriptures water is not a substance, it is a concept that is connected in a special way with the origin of life. Water is the most common substance on earth and is now the most studied element, yet still its mysteries capture our curiosity.

Dr. Emoto dedicates his life to studying water and he deduced that all life-affirming water crystals generate an hexagonal structure, the six-pointed star which has powerful healing potential.

When water changes phases (solid/liquid/vapor), it preserves its basic structure, which is the program for life, yet it actually clears and resets itself, and the memory is cleaned out. This is such a relief, since it means that water has learned how to bring the BEST of the past forward. It is literally holding the template solid in that beautiful six-pointed star so that we can choose love over fear, and make positive changes each time we drink water.

He makes an indisputable case for praying to our water before drinking it, and some people are even letting their water absorb crystal/mineral energies before drinking it for an extra boost!

Other scientists traveled to Roraima in Venezuela “the mother of all waters” where water actually materializes as water droplets in the misty air and falls as rain. The water samples collected there were measured for their energy output, and were found to be 40,000 times more powerful than ordinary drinking water. It is really a completely different substance; however, nowhere in the world is the water the same.

Water assimilates the information and vibrations of the land with its specific energetic features, thus it has been shown that the water inside people’s bodies is identical to the water where they were born, proving we each have different water inside of us too!

Now we understand that our water is alive, it is unique, and has memory and consciousness. We can co-create with water by imprinting on the water our positive intentions.

Water plays the key role on our planet on how this information is disseminated and it may very well be the salvation for many of our global technology/energy demands and our growing health concerns. Water, in fact, a malleable natural computer. Researchers have successfully used water droplets encoded with information traveling along copper wires to replicate computer calculations, all without needing to be plugged in to an external energy source.

The liquid in our body is an information-transference system; the water molecules join together in clusters that act like memory cells which are capable of recording waters’ whole history as if on magnetic tape. Within waters memory cells there are 44,000 information panels, each responsible for its interaction with the environment, much like our nervous system.

For centuries, Eastern medicine have based their studies on reading the vibrations and resonance of the human bodies water content. By using the patient’s pulse they can diagnose resonance, and they then can prescribe mantras for the person to chant that will re-pattern the water inside them and heal it!

Parksville Qualicum Blessing Circle

*Meeting every other Wednesday
from 6 - 8 p.m. in the home/yoga studio
of Bonnie Evoy, www.theqmunity.ca
180 Fern Rd. W., Qualicum Beach*

The earth resonates at 8htz and when we look at prayers uttered in any language from a pure heart, we measure the same 8htz. 8htz creates holy water with Dr. Emoto's observed hexagonal structures.

Other water studies have revealed tests from live blood analysis done on patients before and after drinking a small amount of pure structured water. The results are amazing. Within 12 minutes blood cells that had lost their electrical charge and were sticky and clumped lifelessly together (*such is the case with arthritis, heart disease*) were buoyant and surrounded by energy. The water had completely shifted the PH of the body and may rectify a host of health improvements listed below:

- Rapid hydration
- Heightened immune function
- The efficient removal of toxins
- Better nutrient absorption
- Improved oxygenation to the blood stream
- Enhanced muscle tone
- Enzyme activation
- Cholesterol reduction
- Fewer headaches
- Decreased water retention
- Weight loss
- Improved longevity
- Overall greater health

It is easy to see that we need to pay attention to the water we are putting in our bodies, and take every opportunity to bless and thank the water in our lives.

In keeping with that thought, I invite you to join the many people around the planet every Sunday, who spend a moment loving and asking water to rejuvenate itself. If we do this at various times, we will create a powerful wave of transformation. And like the oceans themselves, together our healing vibrations will sing with the waters of the world.
