

## What is Marine Phytoplankton?

**Phyto** = "Light" **Plankton** = "Floating/Suspended"  
 Scientists at NASA theorize that some 3 1/2 billion years ago, the world was changed forever. The appearance of tiny organisms with the ability to convert sunlight, warmth, water and minerals into protein, carbohydrates, vitamins and amino acids **marked the beginning of life**. Marine Phytoplankton, the single-cell plants are the basis of all other life forms on planet earth, they are the 'vegetation' of the ocean. Marine **Phytoplankton** are responsible for making up to 90% of Earth's oxygen.

**An AMAZING complete whole food!**  
**Try it and FEEL the Difference!**

ForeverGreen products liberate, activate and help people experience the joy of living in their prime, regardless of the season of their life.

**Unique, Natural, and Life-Enhancing**, they address the health and vitality interests of mankind at every stage of life. **Making Health Pleasurable & Measurable** Physically, Mentally and Financially!

**FrequenSea and MORE - visit our website!**

# FrequenSea Goes to the very base of the food chain!

## Benefits of Marine Phytoplankton

Our Marine Phytoplankton is powerful because of the exclusive technology in reproducing **over 200 species of Marine Phytoplankton** on land with **proprietary harvesting** and in the **extraction process** that combines the benefits of phytonutrients with a natural and balanced composition of sea minerals. Phytonutrients are natural plant-based chemicals that promote proper metabolic functions. Many of them exhibit potentially promising effects in human physiology:

General Nutrition	Neurological Support
Cardiovascular Health	Skin Care
Cholesterol	Vision
Blood Sugars	Liver Health
Sleep	Energy

**PATENT PENDING PROCESS**

## Fortified with Frankincense

Throughout history, Frankincense has been used to treat and or prevent:

- Cancer
- Abdominal tumors
- Arthritis
- Heal wounds
- Renew Cells
- Lower fever
- Fight off infections
- Natural Anti-Depressant

## Astaxanthin – Super Sea Algae

Astaxanthin is a powerful, natural, biological antioxidant extracted from the marine micro-algae, *Hae-matococcus pluvialis*. Many carotenoids, such as astaxanthin, act as antioxidants to protect our cells from free radicals. Astaxanthin's powerful antioxidant properties are related to its unique molecular structure.
